RE: Notice of Supplemental Filing
E-00000D-07-0376
Transmission Line 10-year Plan – 2008

Gentlemen:

Gila Bend Power Partners, LLC submits the attached supplement to its 2008 10-year plan docketed January 30, 2008, which inadvertently omitted a reference to the 500kV transmission line approved in Case 119.

Respectfully submitted,

HEATHER KREAGER

RE: Transmission Line 10-year Plan – 2008
Docket No. E-00000D-07-0376

Gentlemen:

Gila Bend Power Partners, LLC is planning to build two 500kV transmission lines and a related switchyard as part of the Gila Bend Power Project (GBPP); CEC Case 109 (approved 6/21/01 – extended through 4/11/11), and CEC Case 119 (approved 4/25/03 - extension request pending). (See attached interconnection diagram, Exhibit 1 and route map, Exhibit 2).

Under A.R.S. §40-360.02, following is a description of the two approved transmission line projects:

Case 109: The 500kV transmission line will run from the GBPP site, in the northwest corner of Gila Bend along Watermelon Road to a new switchyard approximately one quarter mile east of Arizona State Highway, Route 85. At the new switchyard, referred to as the Watermelon Switchyard, the 500kV transmission line will interconnect with the Arizona Public Service Gila River Line, which connects the Watermelon Switchyard to the Jojoba Switchyard.

Case 119: The 500kV transmission line will be constructed from the Jojoba Switchyard to the Hassayampa Switchyard. The line will be constructed in an established BLM Transmission corridor, adjacent to the existing Kyrene line and the Palo Verde to Pinal West line currently under construction. The 500kV transmission line will interconnect at the Hassayampa Switchyard.

The GBPP and related transmission system were first included in the 2002 Biennial Transmission Assessment dated December 2002.
